

Electronic Supplementary Material

Jesús Mendieta and Federico Gago

In silico Activation of Src Tyrosine Kinase Reveals the Molecular Basis for Intramolecular Autophosphorylation

Figure 1. C α trace of Src tyrosine kinase catalytic domain highlighting in different colours the structural regions (a–e) depicted in Figure 2 of the main text.

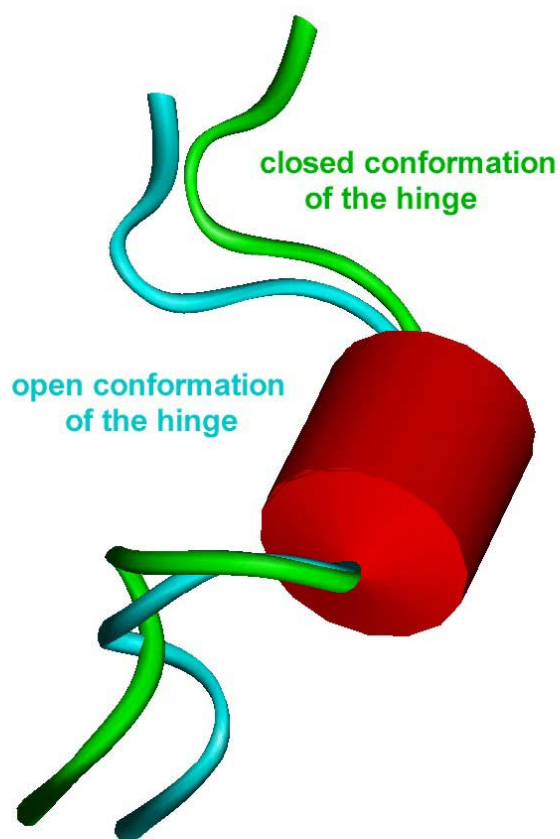

Electronic Supplementary Material

Jesús Mendieta and Federico Gago

In silico Activation of Src Tyrosine Kinase Reveals the Molecular Basis for Intramolecular Autophosphorylation

Figure 2. Detailed view of the hinge region in both the open (cyan ribbon) and closed forms of the Src holoenzyme. Helix C (red cylinder) has been used for superimposing both structures so as to highlight strand displacements. This supplement is available in JPEG format (Mendieta_Supp.jpg).
